DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-11 are rejected under 35 U.S.C. 102(a)(e) as being anticipated by Miyazaki et al (2003/0044689) filed on 2/22/2002 with a foreign application JP2001-258859 filed on 8/29/2001.

With respect to claims 1, 2, 10, and 11, Miyazaki et al show in figure 1 a battery pack (VB1-VB12) including a series combination of cell units, a motor drive control circuit MPU, a current sensor CT, a voltage detecting circuit IC1-IC3, a reference voltage drop memory section (See figures 5 S7 and figure 9.), an offset detecting section (See figure 7 OFFSET COMPENSATION.), and a correcting section (See figure 7 COMPENSATION.)

With respect to claims 3, 5, and 6, figure 2 shows that the voltage comparators CMP1-CMP3 are used to compare the voltage of the batteries VB1-VB4 with the VOLTAGE REFERENCE 2 to determine the battery pack voltages including the total voltage.

With respect to claims 4 and 7, Miyazaki et al show in figure 5 S7 and figure 9 the register for temporary storing the serial signals of the voltage.

With respect to claim 8, the current sensor CT is connected in a circuit section to sense a discharge current supplied from the battery pack.

With respect to claim 9, Miyazaki et al show in figure 7 the OFFSET COMPENSATION and COMPENSATION detecting structure.

Citation of Pertinent References

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Miyazaki et al (2005/0242775 or 6,762,588 or EP1289096) discloses battery apparatus for controlling plural batteries for motor vehicles comprising battery packs, voltage detectors, current sensor, and off set compensation.

The patents or publications to Moore (2006/0022639), Furukawa (2002/0196000), Takahashi et al (6,262,561), Nakanishi (2003/0001544 or 6,573,688), Ohsawa et al (6,255,826), Arledge et al (5,965,996), King et al (2004/0135544), Katoh (2002/0158634 or 6,646,442), Emori et al (2001/0011881 or 6,917,181), and Agatsuma et al (5,932,932) disclose battery pack charging and discharging voltage control systems.
